SUMMARY

Software engineer with a data engineering focus and ~5 years of experience building ETL pipelines, data models, and analytics solutions in Python and SQL. Delivered enterprise-scale systems in healthcare and defence domains. Currently deepening expertise in Azure cloud data infrastructure and modern data stack tooling (Airflow, dbt).

EDUCATION

International Islamic University Malaysia (IIUM)

B.IT (Hons) Business Intelligence & Analytics — First Class | CGPA: 3.85

Kuala Lumpur, Malaysia

Jan 2017 – Sep 2021

EXPERIENCE

Mindmatics Sdn Bhd

Software Engineer — Data Engineering Focus

Kajang, Selangor

Sep 2022 – Present

- Designed and maintained automated daily ETL batch jobs ingesting from legacy databases, REST APIs, and CSV/Excel files — including deduplication logic for patient records — delivering processed data to a target database powering downstream dashboards.
- Designed a military healthcare relational database spanning ~230 tables across 20+ modules (patient records, appointments, medical board, immunisation, military deployment).
- Owned the full data layer for Power BI dashboards deployed across multiple military health units — SQL query writing, data transformation, and dashboard publishing for hospital staff and management.
- Built a video preprocessing pipeline to extract and label ~600 training images from multi-day ship activity recordings, supporting an AI-powered object detection model.

Selangor Human Resource Development Centre (SHRDC)

Data Science Trainee

Shah Alam, Selangor

Jun 2022 – Aug 2022

- Built and evaluated machine learning models using Scikit-learn for structured data classification tasks.
- Performed exploratory data analysis and preprocessing using Python (Pandas, NumPy) and SQL to prepare training datasets.
- Developed data visualisations and analytical dashboards to communicate model insights to non-technical stakeholders.

Skymind CNS Sdn Bhd

Junior AI Engineer

Georgetown, Penang

Mar 2022 – May 2022

- Developed a deep learning web application for Malay-language sentiment analysis on Twitter data using TensorFlow.
- Automated database cleaning and population workflows via Python scripting, reducing manual data preparation effort.
- Designed and deployed RESTful APIs for an internal admin dashboard.

Mesiniaga Berhad

IT Support Engineer (Intern)

Subang Jaya, Selangor

Feb 2021 – Aug 2021

- Provided on-site IT support and maintained technical documentation for UEM Sunrise Berhad's IT operations.

PROJECTS

de-portfolio | Python, Apache Airflow, PostgreSQL, dbt, Power BI

2026

- End-to-end data pipeline ingesting Twitter data, processing sentiment scores with a Python NLP model, orchestrated with Apache Airflow, loaded into PostgreSQL, transformed with dbt, and visualised in Power BI.

Lexio | Python, FastAPI, SQLAlchemy, SQLite, React.js

2026

- Full-stack language learning application with JWT authentication and relational data modelling via SQLAlchemy. Implements spaced repetition logic for vocabulary retention.

Malay Twitter Sentiment Analysis | Python, TensorFlow, NLP, Java

2022

- NLP pipeline for sentiment classification of Malay-language tweets, paired with a Java web application for live inference.

CERTIFICATIONS

Google Data Analytics Professional Certificate — Google Career Certificates
Certified Engineer in Computer Vision — Skymind Education Group
Microsoft Certified: Azure Data Engineer Associate (DP-203) — Microsoft
Databricks Certified Data Engineer Associate — Databricks

TECHNICAL SKILLS

Languages: Python, SQL

Data Engineering: ETL pipeline development, batch processing, data ingestion, database schema design, data modelling

Data & Analytics: Pandas, NumPy, Scikit-learn, Power BI, Tableau

Databases: PostgreSQL, MySQL

Cloud & Infra: Git, Docker
